Mr. and Mrs. R. E. Rutherford sent what might have been a vicious accident to the ribs, while they were driving along near here in a buckboard.

They were leading a horse behind, which got frightened and got free from the hind wheel and turned the vehicle over.

Mrs. Rutherford is in serious condition, but her 1 child came out without a scratch.

With the exception of a few scratches Mr. Rutherford was alright.

A Social Party.

The entertainment given in the Washington Hotel on the afternoon of May 1st by the choir, under the leadership of Mr. Steensman, was a great pleasure affair, although not as many were present as on previous occasions, owing doubtless to the inclemency of the weather, the proceedings were all of a相當ly nature and the program equal to, if not surpassing, the former.

After singing by the choir, prayer was offered by Frederick Petersen. Then followed songs, dances, recitations, etc.

The different quartets which were participated in by Messrs. Ober, Steensman, Eugene Anderson, E. Steensman, Epiphany Boys, Will Judd and the Masons, Van, Frank, Peter, Mark and Lydia Hansen, were loudly applauded. The Masons and May High entertained the audience with a beautiful duet, and Messrs. Ober, Steensman and Edward Steensman sang a Norwegian duet with good effect. Miss Clara Pendleton and the Bell Girls were present and did well.

The dry farming was greatly benefited by the sound rains and the fall grain looks well.

Plenty of Land.

Bozeman, May 1st, 1895.

Evening Tops.—There are about one hundred acres of land here pastured but fall in sheep. The land is broken well and falls fair to raise a good crop. It is suited for dry farming. Last week's rainfall was enough to bring it out in fine.

There are commands of acres of good land in this country, that would raise hundreds of thousands of bushels of grain each year, with a good market for the home lumber, which is willing to settle in.

Thousands of acres in Davis county are planted every fall, and I never seen as good and as plump grain there raised without irrigation, as is raised with it.

It is being demonstrated that the best grain lands are on the hills. Wheat, barley and oats are raised here and not irrigated.

Farmers in Sumner country, don't be afraid to plant the right kind of grain, your water expenses, for it will pay you to do so, the rate of 17% will give it a handsome profit.

Mr. Parker has been looking up a book business and is discussing buying a brickyard at Coalville, as he has made all the necessary arrangements in case he can get it at that place. He will decide in the near future as to what he will do about making brick here.

The first rotation and lettuce of the season were sown at S. H. Scott's on May 8th.

I have noticed that the Pac. Beach Irrigation Company's assessments have not exceeded 10 cents per share, while the Hoytville Irrigation Company's assessments have averaged \$1.20.

Oil may be located under the mineral laws. Proof that neighboring lands contain oil is not sufficient to determine entry of land returned as agricultural.

Mineral locations prior to survey, not in conflict with reserved school sections.

A failure to comply with local regulations is matter for protest or advertisement.

This, from an exchange is worth considering: "Last week a man advertised in the Pilot for the return of a rifle that was stolen from his barn, or the thief would be arrested. In the past week he had six robust sons from 'unknowns' and letters telling where to find four more. Notes talking, advertising pays."
